

---

**Note from Probari:**

Nurse Monica did a great job on John Doe's admission assessment!

---

**Time Sensitive Recommendations****America, Captain**

- ☐ [Admission Review] Document notification to provider regarding SBP of 175 mmHg documented on admission; there were no new VS obtained/entered with the assessment completed 6/14/23 and unable to locate f/u on BP or notification to provider or responsible party.
- ☐ [Admission Review] Recommend reassess area to R neck as it is noted in Admission assessment there are sutures present. Document amount of sutures present, appearance and orders to remove when applicable.
- ☐ [Admission Review] Add Foley catheter order with balloon size, catheter size, and diagnosis. Previous order: May anchor 5 mL/16 Fr Foley Catheter for obstructive uropathy.

**Luke, Skywalker**

- ☐ [Infection Review] Ensure Bactrim DS is rescheduled in MAR if first dose not available to start today as scheduled. (6/16 0900 dose was not signed off yet during review.)

---

**Standard Recommendations****Vader, Darth**

- ☐ [Admission Review] Consider obtaining order for daily weights related to dialysis and CHF.

**Yoda, Baby**

- ☐ [Admission Review] Consider adding to medication order for Acetaminophen to not exceed max dose of 3000mg acetaminophen in 24 hour period from all sources.

---

**For Your Information****Luke, Skywalker**

- ☐ [Infection Review] Recommend completion of a "Antibiotic Time Out" 48-72 hours after initiation of antibiotic. Document residents overall response to therapy, reviewing labs and diagnostic results. Address pertinent findings with provider reviewing duration of therapy and appropriateness of antibiotic being used. Documenting in medical record.

**Yoda, Baby**

- ☐ [Admission Review] Unable to complete medication reconciliation due to lack of preadmission records available in facility EHR or IHIE at time of review.
-
